

According to the requirement of China on COVID-19 control and in order to effectively prevent and cope with importation of COVID-19 cases and ensure the safety and health of people at home and abroad, we request your kind attention to the following notice.

1. As of 00:00 on March 20, inbound travelers from all countries and regions entering China via Qingdao airport whose final destination is in Shandong, and persons who entered China via other ports of entry less than 14 days ago with the final destination in Shandong are all subject to 14-day quarantine in officially designated places at the travelers' own expense in order to ensure safety during COVID-19 control.

2. Inbound travelers at Qingdao airport who are found to have fever or respiratory symptoms in the screening shall be sent by emergency medical staff to a designated hospital for further testing and treatment and shall be put under quarantine for 14 days. Their close contacts shall be sent to a designated hotel for a 14-day medical observation.

3. Inbound travelers who should be put under group quarantine shall be received by districts and county-level cities of Qingdao in turns. Inbound travelers whose destination is another city in Shandong shall be picked up by COVID-19 control staff of that city. If such pick-up is not available for the moment, the traveler will be quarantined in Qingdao. Travelers who are bound for other provinces, with no specified symptoms, and are not close contacts, may proceed to fly on to their destination after passing the risk assessment and screening test.

4. A screening test will be carried out by the customs when the plane arrives. Due to a large number of international arrivals currently at the Qingdao Liuting International Airport, it may take a relatively long time (about four to six hours) to finish the screening and to claim your luggage during peak hours. Your understanding and patience will be appreciated. Due to epidemic control needs, we are sorry that meals cannot be provided, but the airport has prepared drinking water and snacks for you.

5. During the screening and quarantine, you may have to receive sampling tests. Thank you for your cooperation.

6. Those who refuse to accept medical monitoring, conceal or give false information about illness, or go out without permit, and who cause risk of or actual spread of the epidemic will be investigated for legal responsibility according to law.

Please scan the QR Code below to register in the Information Registration System for Inbound Travelers Arriving at the Airport.
